

## Login Script

- Determine MSR Access for logged in Agent.
- Launch MSR if Agent has access.
- Launch Browser if Agent does not, passing Producer Code in URL.

## MSR Changes

- Limit member search for External Agents to their members.
- Add Agent information to data used to launch Sales UI.

## Sales UI

- **Quote Flow Component:** Receive and track Agent information.

## Sales Microservices

- **Quote API:** Receive Agent Information and send to Policy Experience API.
- **Policy Experience API :** Receive Agent Information and send to Guidewire.

## Admin Data

- **Community Model:** The Community model needs to be established in Guidewire so the security for external agents established correctly.
